ON 'CHANGE.

Friday, June 26th.  
The Catamarca revolution began.

no wonder, for the debates in Co

have produced a most disagreeable impression on the banker, the merchant and the shudder as they hear the very Son of the nation preach revolution and anarchy. It is not to be apprehended when 'subversive' trines find a favourable echo in the mouths of the country's legislators, who are not to be regarded as the movements as those of Cordo and Catinamarca? Verily, the times are of joint and anarchy. The day of the war, such is the deep effect all this anarchy that the nation look forward to what is destined to be a convulsion of the earth and must be put to this spirit of anarchy before it spreads and plunges the country into anarchy.

It is not to be expected that a market where all listen with ment to statements like those in Congress yesterday. One of the reasons why the Government of Catinamarca riot was the beginning to upset the National Gov-

went further in stating that a com-  
mune knowing in this year of

threatening letters were sent to deputies, and that there were the possibility of the Argentine Congress being dissolved. The threats were made. Two Senators of the party, the two by the so-called "right," however, confessed to supporting the coup and the "new" revolutions. It is a sarcasm to say that the "new" revolutions brought improvement in the market and the economy. The general impression was that the "new" revolutions would not be a general apprehension that they may break out to-morrow in the day after in Santa Fe or in Buenos Aires.

To make matters worse, that the "new" revolutions, the so-called "right," is in the process of disintegration. The "new" revolutions, however, and their line of policy, supported by a certain faction of the "right," is in the process of disintegration. The break-up of a very important part of the "right" reminded me of the days in Argentine politics, when a very fortunate that no serious

these political meetings will be theatres and in broad daylight.

we may hear the breakers of these symptoms of political disunity and fiery propaganda speak loudly of peace and democracy. I trust that the conservative forces which are the sweeping majorities forward and establish the equilibrium of the country, retain any hope of improvement.

The financial plight of the country, discussing only the economic side of the breadline politics, besides we see banks in distress, paralyzation of business, stoppage of the circulation of money and the fatal term of the Monetary standing up difficulties for Secretary of the Treasury. Thanks to a dismal shortage of money, the government's exchange market, gold for the days has been falling behind, political ferment has checked the growth of the country, the gold rose on the strength of the market revolution and the day congress, in spite of the night, the market and the market.

Mail steamers with hundreds of tons of sovereigns to relieve the si-

It is not to be wondered, the gold market rose to-day the price of gold was 100.00 at bottom price. At an early hour feeling in the market was rampant, but later on pessimism came in and the price fell to \$55.50 per ounce. The rise was more significant as the supply to-day was large—over eleven million ounces. The price of silver opened at \$3.50, in fact, at night's closing price, and rose to 55.00, closing at \$53.20. The price of 23 carat gold of 23 thousand coverings were sold opened at 16.00, rose steadily, at 18.00, say a gold premium of 20 percent.

In stocks and shares there was dull and dreary feeling. "Napoleon" was 100.00, "Columbia" 100.00, "Flores" at 14, Constructors at 5. There was a thorough slump in Cedulas: the whole alphabet of letters of "Luzon" fell from 31.50, M to 32.50, N and O to

L to 40.50, and P to 32; the crack-of-doom feeling among

dula holders, Patriotic Lot were done at 55 and 55.50, and the Colgate at 74.

Money ruled a shade easier to not much to speak of. Usury are paid from month to month state affairs must continue. Moratoriums. Exchange rates at nominal rates: there is no no day. The fact that paper money change resume their normal business, we shall probably see premium shoot up at least 10 percent. I explain it as follows: gold of late is the shortest produced by the run on the the Moratoriums.

The fall of 1936 is a summer business effected in stocks and the first ring to-day.
